

## Climate Risk Storylines Connecting Europe to the World

**RECEIPT** is a Horizon2020 project studying Europe's vulnerability to distant climate events and their impact on **5 key socio-economic sectors**:

MANUFACTURING

AGRICULTURE

FINANCE

INTERNATIONAL DEVELOPMENT

COASTAL INFRASTRUCTURE

### RECEIPT

- reveals impacts of remote climate extremes on the European economy;
- maps ways to identify and reduce vulnerabilities;
- informs about future business opportunities.

### WHY STORYLINES?

Climate storylines develop from a chain of climate-related events, stories and data that show cause-effect over a period of time. Storylines are central to RECEIPT, as they describe events, stories and data in a narrative format and help to understand complex and systemic risks of climate change in our globalised world.

### HOW DO CLIMATE CHANGE IMPACTS IN REMOTE REGIONS INFLUENCE THE EUROPEAN UNION?

The **RECEIPT climate story explorer** In this application you can see stories highlighting several of climate impact hotspots. Scan and watch!
